OIL MAINTENANCE & TIMING CHAIN RELIABILITY

NEW TIMING CHAIN KIT REPLACEMENT?

THE FIRST STEPS TO LONG-LASTING ENGINE HEALTH

1. Lubrication & Wear Prevention

- Engine oil forms a protective film over all your critical internal engine components including the timing chains
- Old or poor-quality oil increases friction, accelerating wear on chain pins, bushings, guides, and sprockets > chain elongation & fatigue

2. Contaminant Removal

- Oil removes combustion byproducts, sludge, and metal particles
- Dirty oil promotes accelerated wear within your engine

3 Heat Management

- Oil dissipates heat from the engine and timing components
- Overheated or degraded oil loses lubrication efficiency

4 Corrosion & Oxidation Control

- Oil additives neutralize acidic combustion byproducts
- Neglecting oil changes allows acids to attack your internal engine components including your new timing chain

5. Engine Longevity & Timing System Integrity

- Clean, correctly graded oil maintains chain tension, lubrication, and minimal wear
- Regular servicing reduces risks of chain elongation

6. Recommendations

- Follow manufacturer-specified oil change intervals or talk with your service advisor about the best service intervals for your specific engine
- Use OEM-approved oil grade and viscosity to ensure your engine is always protected
  Regular oil maintenance is the most important factor in preventing timing chain wear which can lead to catastrophic engine damage.

OIL MAINTENANCE ISN'T OPTIONAL. IT'S ENGINE LIFE INSURANCE.

TIMING CHAIN KIT WARRANTY & SAFETY

FAI Timing Chain Kits are made to the highest standards, utilising industry grade metals and polymers to ensure longevity. FAI kits are backed by a **5 year / 60,000 miles (100,000 km)** warranty for peace of mind.

In the unlikely event of a timing chain kit warranty claim, the customer must provide a 120ml sample of the original engine oil. The sample needs to be submitted at the point the claim is made as the process cannot proceed without it.

Failure to provide a sample may invalidate your claim.

When sending oil samples, please ensure to use:

- ***A leak-proof container***
- ***No Glass***
- ***Not excessive amounts***

CAUTION – SPRUNG TENSIONER

Please be aware that the tensioner contained in this kit is sprung loaded and could cause injury if handled incorrectly.

Do not remove the pin until fitted and always ensure the piston is facing away from you or anyone else within a 5 metre radius.

WARRANTY WARNING

In the case of a timing chain kit claim a 120ml sample of the engine oil must be submitted with the claim. Not to do so will invalidate any claim.

Záruka Upozornění: V případě zasílání reklamace řetězové sady rozvodů FAI , musí být vždy zaslaná kompletní zakoupená sada + 120 ml motorového oleje z daného motoru pro expertízu a posouzení stavu motoru. Nebude-li k reklamaci zaslán vzorek oleje z motoru , bude reklamace zamítnuta

Avertissement pour Garantie: Dans le cas de réclamation en garantie, un flacon de 120ml d'huile usagée devra être envoyé avec les pièces sous peine de refus de la réclamation.

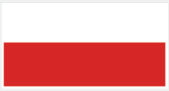

Wichtig für die Garantie: Im Falle einer Steuerkettensatz-Reklamation, ist eine 120ml Ölprobe beizulegen. Jeglicher Garantieanspruch erlischt, wenn die Ölprobe nicht beiliegt.

Προειδοποίηση εγγυήσεων: Σε περίπτωση αίτησης εγγύησης σετ χρονισμού καδένας απαιτείται να αποστέλλεται μαζί με το σετ και δείγμα 120ml από το λάδι του κινητήρα. Σε αντίθετη περίπτωση δεν θα γίνεται δεκτή καμία αίτηση εγγύησης.

Nota Importante per richieste di Garanzia: Nel caso di una richiesta garanzia per un Kit Tendicatena, una campionatura pari a 120ml di olio motore utilizzato deve essere obbligatoriamente inviata insieme al kit da far visionare. La richiesta di garanzia non sarà presa in considerazione se questa procedura non sarà rispettata.

Warunki gwarancji: W przypadku reklamacji zestawu łańcucha rozrządu należy dołączyć próbkę oleju silnikowego o pojemności 120 ml wraz z reklamowanym towarem, w przypadku braku tej próbki reklamacja nie będzie uznana.

Garantia Advertência: No caso de reclamação sobre um kit de distribuição de corrente tem que ser enviada com a mesma uma amostra de 120 ml do óleo do motor. Se não for enviada essa amostra a reclamação não é válida.

ВАЖНАЯ ИНФОРМАЦИЯ О ГАРАНТИИ: При гарантийном случае с комплектом цепи ГРМ вместе с рекламацией необходимо предоставить образец минимум 120 мл моторного масла, которое было залито в двигателе. Если это не будет сделано - рекламация рассмотрена не будет

PAŽNJA: U slučaju reklamacije seta razvodnog lanca motora, obavezno se mora priložiti 120ml uzorak korišćenog ulja iz motora. Nepoštovanje ovog upozorenja će poništiti svako pravo na reklamaciju.

Záruka Upozornenie: V prípade zasielania reklamácie reťazovej sady rozvodov FAI, musí byť vždy zaslaná kompletná zakúpená sada + 120 ml motorového oleja z daného motora pre expertízu a posúdenie stavu motora. Ak nebude k reklamácii zaslaná vzorka oleja z motora, bude reklamácia zamietnutá.

Aviso de garantía: En caso de incidencia mecánica con un kit de cadena de distribución debe aportarse una muestra de 120ml del aceite usado junto con las piezas objeto de la reclamación. De no hacerse así cualquier reclamación queda invalidada.
